This document is neither a solicitation to buy nor an offer to sell securities, and it is not intended as investment advice. Information contained herein reflects our judgment or interpretation at the time of publication and is subject to change without notice. This information, including gross historical performance, pertains solely to the theoretical *model portfolios* published by Sabrient Systems LLC. Sabrient is not responsible for the usage of such portfolios by any third party, including without limitation the *Baker's Dozen* UITs sponsored by First Trust. In addition, the performance numbers herein do not reflect the deduction of brokerage commissions, execution fees, or other expenses that may be paid by any third party making its own investment in the portfolios. First Trust UITs are subject to fees, NAV on purchase date, and variations in construction of the portfolios, which may over time reduce performance of such UITs in comparison with the performance of Sabrient's model portfolios.

Updated 4/17/2025

Summary Talking Points

- Sabrient leverages a process-driven methodology developed by former engineers and forensic accountants to build quantitative, fundamentals-based, multifactor models and a "quantamental" (quantitative screen plus fundamental review & selection) approach. Sabrient founder David Brown unveils it all in his new book, How to Build High Performance Stock Portfolios (on Amazon).
- The vast majority of Sabrient portfolios created since major process enhancements were implemented in December 2019 have outperformed or stayed close to their benchmarks (gross total return), despite narrow market breadth dominated by the Big Tech megacaps that have made the cap-weighted S&P 500 (SPY) hard to beat. Portfolios include: *Baker's Dozen*, Dividend, Small Cap Growth, and Forward Looking Value.
- 3. The new Q2 2025 Baker's Dozen launched on 4/17 with 13 concentrated positions across a diverse group of large/mid/small caps (5/4/4) and with an 11/2 split between growth/value, reflecting a strong growth bias largely due to lowered valuations. The Baker's Dozen is designed to provide the potential for outsized gains—for example, the Q1 2024 portfolio is up +53% thru 4/15 (see slide 8).
- 4. The annual Forward Looking Value 12 launched on 7/31. It is a less-concentrated and more value-oriented version of Baker's Dozen.
- 5. The latest **Small Cap Growth 45** launched on 1/22. It provides an <u>alpha-seeking alternative</u> to a passive position in the Russell 2000 for small-cap exposure in expectation of greater market breadth. The new **Small Cap Growth 46** portfolio will launch on 4/22.
- 6. The latest **Dividend 51** launched on 2/11. It employs a <u>GARP & Income strategy</u> that seeks capital appreciation from quality companies with a solid growth history and reliable dividends. It pays a **current yield of 4.25%** on NAV.
- 7. A key proprietary alpha factor is our Earnings Quality Rank (EQR), an accounting-based risk assessment signal used in all our portfolio strategies. It is also licensed as a prescreen to the **First Trust Long-Short ETF (FTLS)**, an absolute return portfolio.
- 8. The wild card for stocks is uncertainty (severity and duration) of tariffs, which seem designed to induce a swift resolution. But even with volatility and a larger correction during H1, assuming rational heads prevail, stocks should recover in H2 with greater market breadth.
- Rather than the passive cap-weighted indexes dominated by Big Tech, investors may be better served by active stock selection that seeks to identify under-the-radar and undervalued gems primed for explosive growth. <u>This is what Sabrient seeks to do in our various</u> <u>portfolios</u>, all of which provide exposure to Value, Quality, Growth, and Size factors and to both secular and cyclical growth trends.

Company Overview

Sabrient Systems LLC:

- Independent equity research provider and SEC-registered RIA founded in 2000
- Quantitative fundamentals-based multifactor models created by:
 - ✓ team of engineers and analysts led by founder David Brown, a former NASA engineer on the Apollo 11 moon landing project, and CEO Scott Martindale, a former Chevron engineer
 - ✓ team of forensic accounting specialists from Gradient Analytics, a wholly owned Sabrient subsidiary
- Process-driven, bottom-up methodology leveraging a scientific hypothesis-testing approach to model development
- Unlike most RIAs, we don't manage investor money directly but instead receive licensing/consulting fees

Products & Services:

- Quantitative equity research, models and data sets, rankings of stocks & ETFs, online investor tools, and insightful market commentaries
- Portfolio strategies for various investing styles, stock portfolios for UITs and SMAs, rules-based equity indexes for ETFs
- Best known for our **Baker's Dozen** franchise, a 13-stock portfolio first introduced in 2009 based on a proprietary Growth at a Reasonable Price (GARP) "quantamental" approach
- Baker's Dozen and 3 other offshoot strategies offered as UITs through First Trust Portfolios
- 8 core proprietary multi-factor models, including the *Earnings Quality Rank (EQR)*, an accounting-based risk signal designed by subsidiary Gradient Analytics and used internally for Sabrient portfolios. It is also licensed to hedge funds and to the First Trust Long-Short ETF (FTLS).

1. Quantitative screen to narrow large eligible universe (50-100 names)

Forward P/E, forward EPS growth, recent dynamics of analyst consensus estimates, earnings quality (based on expertise of subsidiary Gradient Analytics), consistency & reliability of earnings growth

2. Fundamental analysis to identify top candidates (approx. 25 names)

Still mainly numbers-driven, but not algorithmic

3. Final Stock Selection (13 names)

Manual process, adhering to sector concentration limits

We believe a GARP strategy is "all-weather." So, what could go wrong? Two things:

1) Consensus EPS estimates are reduced after portfolio launch or the company fails to achieve them.

2) Investor sentiment turns defensive, leading to narrow market breadth and avoidance of lesser-known firms.

> Q2 2025 Baker's Dozen (quarterly, 13 stocks) launched 4/17/25

⇒ Our flagship product is a concentrated, all-cap, alpha-seeking portfolio that balances value/cyclical growth with high-quality secular growers.

Small Cap Growth 45 (quarterly, 50 stocks) launched 1/22/25

- \Rightarrow Alpha-seeking alternative to the passive Russell 2000 for small cap exposure.
- ⇒ Poised to benefit from improving market breadth and rotation to small-mid caps
- \Rightarrow The new Small Cap Growth 46 will launch on 4/22/25

Dividend 51 (quarterly, 50 stocks) launched 2/11/25

⇒ High-quality GARP + Income portfolio; Current Yield of **4.25%** on NAV

Forward Looking Value 12 (annual, 33 stocks) launched 7/31/24

 \Rightarrow Less-concentrated and more value-oriented version of the Baker's Dozen.

Forward Looking Value - Gross return thru: 4/15/2025

Portfolio	Launch	Close	Gross Return	SPYV Return	Active
FLV 10	7/15/22	10/24/23	24.0%	12.4%	11.6%
FLV 11	7/24/23	11/4/24	20.8%	20.3%	0.6%
FLV 12	7/31/24		-13.8%	-4.1%	-9.6%

The tables show <u>gross</u> total returns (without transactional sales charge, as displayed on the <u>ftportfolios.com</u> website) vs. the most relevant benchmark for all the <u>live portfolios</u> plus those that recently terminated. SPDR S&P 500 Value (SPYV) is the benchmark for Forward Looking Value and First Trust Dow Jones Global Select Dividend Index Fund (FGD) is benchmark for Dividend portfolios.

The vast majority (63%) of portfolios created since enhancements were implemented in December 2019 have either outperformed or stayed close to their benchmarks. Next to terminate is Q1 2024 Baker's Dozen, which is **up +53.4%** since 1/19/24 inception compared to S&P 500's +13/2%, as of 4/16/25, illustrating the outperformance potential.

Worst performers were the Q4 2022 and Q1 2023 Baker's Dozens, which greatly underperformed the S&P 500 mainly due to extreme sector "tilts" away from the benchmark allocations that didn't pan out (*overweight* in Energy and *underweight* in Technology). Since then, we have avoided such sector bets.

Recent Dividend portfolios are badly trailing the benchmark Global Dividend Index due to the strong outperformance this year of international versus US stocks, given our higher weighting to US.

This portfolio enjoyed several big winners, led by 3 of the mega-cap market darlings (NVDA, META, NFLX), easily offsetting some losers. Other top performers include a mortgage servicer and a biotech (oncology).

Laggards included a networking communications firm, an auto parts company, a cloud cybersecurity provider, and 2 oil & gas services firms.

Most of the companies met or exceeded their EPS estimates even laggards VC and RPD, which have sold off due to reduced forward guidance.

The portfolio outperformed the SPY as well as other relevant large cap, mid-cap, and small-cap benchmarks (gross total return).

This portfolio has been led by 4 big winners—most notably Al-driven marketing software firm AppLovin, as well as mega-cap market darling NVIDIA (dominant in Al chips), entertainment powerhouse Netflix, and a major cruise line.

They offset laggards from oil & gas, information management software, biopharma, retail apparel manufacturing, and auto parts.

The portfolio has greatly outperformed all relevant large cap, mid-cap, and small-cap benchmarks including both cap-weight and equal-weight by a wide margin (gross total return).

This portfolio also illustrates the power of having a few big winners within a concentrated portfolio.

This portfolio so far has been led by several solid winners, which have only partially offset a few big losers. Top performers are powerhouse mega-caps Netflix and NVIDIA, plus two packaged foods firms and a software infrastructure firm (that was acquired).

Laggards include companies from oil & gas, specialty chemicals, and cloud cybersecurity infrastructure.

So far, the portfolio is underperforming its large cap benchmarks but is ahead of relevant mid and small cap indexes (gross total return).

MDY	SPDR S&P MidCap 400 ETF Trust		-13.3%				
IWM	iShares Russell 2000 ETF		-16.8%				

This portfolio so far has been led by an oil & gas services firm, a biotech, and an insurance holding company.

Laggards include a specialty materials company focused on engineered polymers, a power tools maker, a fintech payments firm, and a maker of digital storage devices.

So far, the portfolio is slightly trailing its large cap benchmarks but is inline or ahead of other relevant mid and small cap indexes (gross total return).

MDY	SPDR S&P MidCap 400 ETF Trust		-14.7%				
IWM	iShares Russell 2000 ETF		-17.0%				

This new portfolio so far has been led by a mortgage servicing firm, a biotech, and an interactive social media platform.

Laggards include a major airline, a fintech payments firm, and an engineering & construction firm.

So far, the portfolio is trailing all its relevant large cap, mid-cap, and small-cap benchmarks (gross total return) but is still in primary market and offers a solid and diverse group of mid and large cap stocks for the Trump 2.0 economy.

SectorCast Rankings and Sector Rotation Model

Sabrient SectorCast Sector Rotation Strategy - As of 4/15/2025 Suggested Top 3 Sector ETFs for Bullish, Neutral, or Defensive Outlooks Bullish/Neutral/Defensive bias based on SPY vs. 50/200 day moving averages; 30-90-day forward look										
Sector	ETF	Outlook Score	Bull Score	Bear Score	Net Score: Neutral Bias	Net Score: Bullish Bias	Net Score: Defensive Bias			
TECHNOLOGY	IYW	87	57	40	87	90.0	51.6			
HEALTHCARE	IYH	81	47	61	81	60.2	85.4			
TELECOMMUNICATIONS	IYZ	57	47	57	57	52.1	68.7			
UTILITIES	IDU	50	45	71	50	44.2	90.0			
INDUSTRIALS	IYJ	32	56	51	32	68.7	48.2			
CONSUMER DISCRETIONARY	IYC	31	55	46	31	65.6	39.2			
CONSUMER STAPLES	IYK	21	40	73	21	20.6	81.7			
BASIC MATERILS	IYM	19	52	55	19	53.2	49.8			
FINANCIALS	IYF	15	56	54	15	63.0	46.5			
ENERGY	IYE	4	53	54	4	50.9	42.0			
and Bear Score are based on price behavi	Sabrient's <i>Outlook Score</i> employs a forward-looking fundamentals-based scoring algorithm to create a composite profile of the constituent stocks. <i>Bull Score</i> and <i>Bear Score</i> are based on price behavior of the underlying stocks on particularly strong and weak days over the prior 40 market days. High Bull indicates a tendency for relative strength in a strong market, and high Bear indicates a tendency for relative strength in a weak market (i.e., safe havens). High for all									

Sabrient's SectorCast rankings reflect a neutral bias, as cyclicals and secular growth sectors are spread out across the rankings. Technology (dominated by the Big Tech, of course) at the top, particularly as the lofty valuations have receded. However, cyclical sectors Materials and Energy remain at the bottom, and Financials have fallen as well.

Valuations have pulled back on defensive investor sentiment from the uncertainty (severity and duration) of tariffs and trade wars. However, earnings growth forecasts have held up, and interest rates are expected to fall further. Technology still displays the highest forward P/E (24.1x, as of 4/15) but remains at the top of the rankings due to still-solid EPS growth estimates (18.1%), a relatively modest forward PEG ratio of 1.33, favorable sell-side analyst earnings revisions, the highest profit margins and return ratios, and substantial insider buying.

Our sector rotation model has a **defensive bias** (based on the SPY trading below both its 50-day and 200-day moving averages). So, the model suggests holding Utilities (IDU), Healthcare (IYH), and Consumer Staples (IYK).

Market Observations & Outlook - 1/2

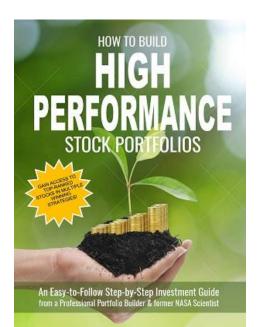

- 1. GDP and jobs growth have been over-reliant on government spending and its relatively inefficient use of capital compared with organic private sector growth. Inflation has ticked up lately but should soon resume its disinflationary trend. Economic indicators are weakening, unemployment is elevated (above 4.0%), and the federal debt and budget deficit have surged. Relatively tight monetary policy, rising bond yields and mortgage rates, and a strong dollar have hurt US consumers, small businesses, and the global economy.
- 2. Allowing elevated inflation in the 2-3% range can help "inflate away" the large federal debt as part of a 3-pronged plan in conjunction with cutting federal deficit spending and implementing fiscal & monetary policies that support robust private sector organic growth—leading to rising productivity, margins, earnings, jobs, wages, GDP—and tax receipts (which since 1960 have averaged 17% of GDP no matter the tax rate). Private enterprise is much better at efficient capital allocation than government bureaucrats.
- 3. The Fed remains behind the curve despite cutting rates 100 bps. A terminal fed funds rate of 3.25-3.50% seems appropriate (vs. today's 4.25-4.50%). Bond yields surged in January (10-year at 4.8%) on investor fears of resurgent inflation and a credit crisis from huge federal debt and deficit, but the 10-year yield then receded substantially (briefly below 4.0%)—signaling that Fed rate cuts are needed. The administration wants lower rates and a weaker dollar to support both US and global economies, allow other central banks to inject liquidity, avert a global recession and credit crisis, and relieve indebted consumers and businesses.
- 4. Despite the market correction, lofty valuations on cap-weight indexes remain. But minus Big Tech titans, valuations are more reasonable. To illustrate, forward P/E on cap-weight Nasdaq 100 (QQQ) is 23.2x and S&P 500 (SPY) is 19.9x, but equal-weight Nasdaq 100 (QQQE) is 20.7x and S&P 500 (RSP) is 15.7x, while S&P 600 small-cap (SPSM) is just 12.8x, as of 4/15. Small cap versus large cap valuations remain extreme.

Market Observations & Outlook - 2/2

- 5. Signs of improving market breadth and rotation away from Big Tech bodes well for market health, as does the several trillion dollars still sitting defensively in money market funds, capital flight into the US, and tight credit spreads—despite high valuations and extreme expectations for Gen AI. The biggest wild card is Trump's trade war and draconian tariff plan, which seems designed to induce a swift resolution. But even with today's volatility and a larger correction during H1—and assuming rational heads prevail—stocks should recover before year end, given business-friendly fiscal policies and a supportive Fed that are designed to supercharge the economy by unleashing the private sector and reducing reliance on government spending.
- 6. At the core of an equity portfolio still should be US large-cap Technology stocks, given their disruptive innovation, huge cash positions, strong earnings growth, free cash flow, margins, global scalability, and wide protective moats. But a broadening market should create investment opportunities in small and mid-caps, value, quality, high-dividend, cyclical industries, and equal-weight indexes, including market segments like industrials, defense, transports, travel, homebuilders, banks, insurers, energy, healthcare, biotech, and REITs. Also, gold and bitcoin should have a place in a diversified portfolio as well.
- 7. Rather than investing in the passive cap-weighted indexes, which display high valuations and extreme divergences in performance and valuation, investors may be better served by active stock selection that seeks to identify under-the-radar, undervalued, high-quality gems primed for explosive growth. This is what Sabrient seeks to do in our various portfolios, all of which provide exposure to Value, Quality, Growth, and Size factors and to both secular and cyclical growth trends.

=> All this is discussed in greater detail in our "Sector Detector" market commentaries at Sabrient.com.

David Brown's new book on his Investing Strategies

DAVID BROWN

Sabrient founder David Brown's new book, *How to Build High Performance Stock Portfolios*, is now available on Amazon.com. Here is the link to buy: <u>https://www.amazon.com/dp/B0DGWCJGR1</u>

(or simply paste that final identifier code into the search on your Amazon mobile app)

David has written a number of other books through the years. In this one, he describes his path from NASA engineer on the Apollo 11 moon landing project to building quant models for stock rankings. But the book's main goal is to share David's approach to creating stock portfolios for **four key investing styles—Growth**, **Value**, **Dividend**, **and Small Cap Growth**—which serve as the underlying strategies for Sabrient's *Baker's Dozen*, *Forward Looking Value*, *Dividend*, *and Small Cap Growth* portfolios.

Our "Next-Gen" Sabrient Scorecards:

You also are invited to access the next generation of our "Sabrient Scorecard for Stocks," which provides a weekly Top 30 stocks list for each of those four key investing strategies (using their underlying quant models). You can also paste your own list of tickers on the Score Your Own Stocks tab to monitor their alpha-factor scores.

I invite you to take advantage of the Free Download offer for the stock scorecard.

As a bonus, we provide a weekly "Sabrient Scorecard for ETFs" with the Top 30 ETFs based on our SectorCast Outlook Score, plus access to the Full Universe of scores for roughly 1,400 equity ETFs.

Both scorecards are quite user friendly for anyone with a basic knowledge of Excel. You can easily sort a list by a given alpha factor, or weight factors to your preferences and then sort the list by Weighted Score.
