***“Quantamental” GARP\* approach with a forensic accounting overlay***

This presentation, including the gross historical performance shown in this presentation, pertains solely to the theoretical *model portfolios* published by Sabrient Systems, LLC. Sabrient is not responsible for the usage of such portfolios by any third party, including without limitation the *Baker's Dozen* UITs sponsored by First Trust. In addition, the performance numbers herein do not reflect the deduction of brokerage commissions, execution fees, or other expenses that may be paid by any third party making its own investment in the portfolios. First Trust UITs are subject to the imposition of fees, and to variation in the construction of the portfolios, which will over time reduce the performance of such UITs in comparison with the performance of Sabrient's model portfolios.

\* GARP = growth at a reasonable price

# Talking Points Summary

- After 6½ years of strong performance from 2009 thru mid-2015 in Sabrient's *Baker's Dozen*, the market became narrow and news-driven leading to **stark divergences in Value vs. Growth factors and Small vs. Large caps** that have been quite harsh on most value and GARP strategies, including ours. Also, narrow leadership meant that a handful of stocks drove **cap-weighted indexes to greatly outperform equal-weight indexes**. Many of the best growth stocks were bid up to such high valuations that they did not score well in our quantitative rankings while most cyclical sectors sold off.
- This led Sabrient to develop and implement **process enhancements** to make its portfolios more "all weather" – primarily by adding a new Growth Quality Rank (GQR) to our quant model that rewards a history of earnings consistency & reliability, in addition to attractive forward valuations and earnings quality that the model has long favored – thus allowing for **exposure to both the long-term secular growth trends and the shorter-term cyclical growth opportunities**. (Also, we continue to have the forensic accounting team from subsidiary Gradient Analytics review every candidate for the portfolios.)
- Indeed, **Sabrient's newer portfolios since December 2019 have shown significantly improved performance** relative to the benchmark, with *some of them substantially outperforming* during quite a range of evolving market conditions. The only portfolio that is significantly trailing its benchmark (although still strongly positive) is the Q2 2020 *Baker's Dozen*; however, it was constructed during the depths of the pandemic in April 2020 when most companies had little or no forward visibility, which Sabrient's model depends upon.
- We expect Value/Growth and Small/Large performance divergences will continue to converge and leadership will broaden such that *active selection, strategic beta, and equal weighting should thrive*. **This should be favorable for growth at a reasonable price (GARP) strategy like Sabrient's**.
- Regardless, our new portfolios – including the Q2 2021 *Baker's Dozen* that launched on 4/20/21, Small Cap Growth that launched on 3/15/21, and Sabrient Dividend portfolio that launched on 3/19/21 – **reflect better balance** between cyclical and secular growth and across market caps.

# Baker's Dozen Long-term Performance

January Model Portfolio (gross total return) – rebalanced when new portfolio is published  
(1/1/2009 inception thru 3/31/2021, end-of-month data points)

Year	Portfolio	SPY
2009	38.6%	26.4%
2010	23.1%	15.1%
2011	7.4%	1.9%
2012	49.8%	16.0%
2013	60.9%	32.3%
2014	26.3%	13.5%
2015	-3.6%	1.2%
2016	5.0%	12.0%
2017	26.3%	21.7%
2018	-17.6%	-4.6%
2019	32.6%	31.2%
2020	21.2%	18.3%
2021 YTD	14.9%	10.3%

## Gross Performance – 12¼ years

Statistics	2009-2021
Annualized Return	20.8%
Average SPY	15.1%
Excess over SPY	5.7%
Standard Deviation	21.4%
Sharpe	0.97
Alpha	1.92
Beta	1.27

# Market Conditions: 2015–2016

- **1H2015** – market up, Sabrient outperformance streak hits 6-1/2 years
- **2H2015** – market suddenly driven by news rather than fundamentals
  - ✓ Election rhetoric, Populism, China devaluation, oil falls, Fed targets rate hikes
  - ✓ Narrow breadth & leadership, led by FAANGM stocks (“FANG” acronym is born)
  - ✓ Smart/rich/successful investors and HFs down double digits; Sabrient performance takes a hit
  - ✓ “NEW NORMAL” of defensive/cautious/news-driven market conditions begins
- **1H2016** – market up, but it’s led by defensives (Utilities, Telecom, Staples)
- **2H2016** – risk-on rotation with all eyes on US presidential election
  - ✓ Post-election rally (as uncertainty is lifted), led by cyclicals
  - ✓ Greater market breadth, lower sector correlations

# Market Conditions: 2017–1H2018

- **2017** – risk-on “Trump Bump” driven by fundamentals (good for GARP)
  - ✓ Synchronized global growth, China strong, rising oil prices, Fed data-driven
  - ✓ New fiscal stimulus from deregulation and anticipation of tax reform
  - ✓ Strong breadth, record low volatility, cyclicals and small caps lead
  - ✓ Momentum factor dominates (versus Value, Quality, Low-Volatility factors)
  - ✓ P/E multiples expand
- **H1 2018** – market continues up, but sentiment turns cautious
  - ✓ Cyclicals and small caps still lead, but with higher volatility
  - ✓ With tax reform in place, investors watch for corporate behavior and capex
  - ✓ Trade war rhetoric worsens; investors turn cautious; P/E multiples compress

# Market Conditions: 2H2018–2019

- **H2 2018** – trade war rhetoric becomes reality; defensive rotation begins
  - ✓ Rotation out of risk-on sectors (value, cyclicals, small caps, emerging markets)
  - ✓ Rotation into risk-off defensive sectors (large cap Utilities, Healthcare, Staples, Telecom) and mega-cap Tech (AAPL, MSFT, AMZN) ... until the Q4 selloff
- **Jan-Aug 2019** – stocks recover but historic market bifurcation persists
  - ✓ China trade negotiations resume; FOMC dovish (“Fed put”); low interest rates
  - ✓ P/E multiples expand despite persistent preference for risk-off momentum/low-volatility/bonds/defensive/mega-cap over risk-on value/cyclicals/small-mid caps
- **Sep-Dec 2019** – risk-on rotation emerges as optimism prevails
  - ✓ Phase 1 deal with China leads to improved corporate visibility
  - ✓ Sustained risk-on rotation into value/cyclicals/small-mid

# Market Conditions: 2020

- **H1 2020** – new highs, a COVID-19 selloff, and then historic recovery
  - ✓ Like H2 2018, market rises despite defensive rotation ... until the historic selloff
  - ✓ Historic rebound off 3/23/20 low; first had strong breadth led by smaller caps & cyclical sectors, but ultimately narrowed to favor secular-growth mega-cap Tech
  - ✓ High dispersion among stocks in a K-shaped economic recovery, with big winners (e.g., among WFH Tech) and big losers (e.g., travel/hospitality/energy)
  - ✓ Little to no forward visibility for most cyclical/value firms stymied our model
- **H2 2020-H1 2021** – new highs and a sustained risk-on rotation
  - ✓ November launches strong risk-on rally as market broadens with sustained rotation into value/cyclicals/small-mid caps on vaccine optimism and stimulus
  - ✓ Uncertainties subside as economy reopens, COVID cases fall, and earnings momentum accelerates beyond expectations

# Market Bifurcation Continues to Converge

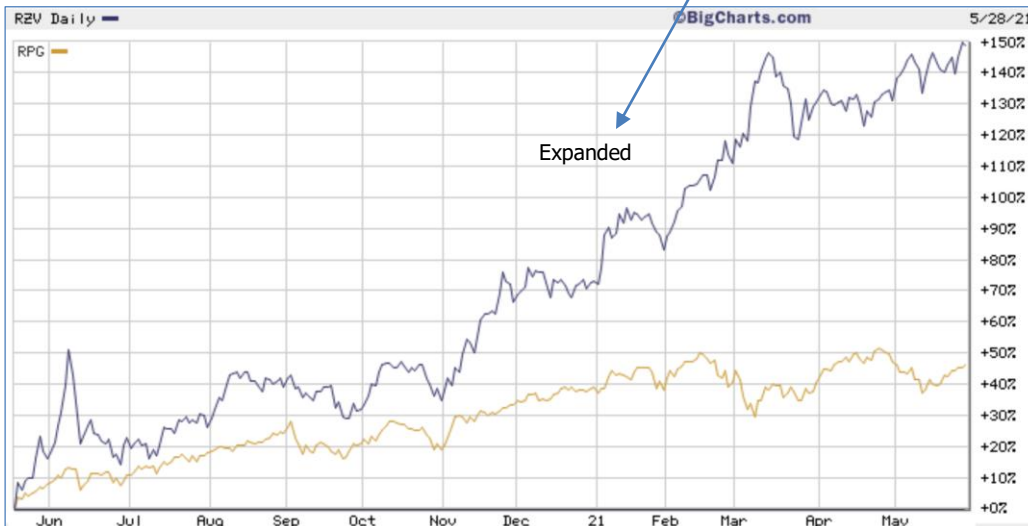

Historic divergences between Growth/Value and Large/Small shows sustained convergence

The 6-year chart shows stark divergence between both Growth/Value and Large/Small.

Notable market bifurcation followed escalation in China trade war in June 2018 and worsened from COVID-19 and economic lockdowns. RPG enjoyed a strong uptrend while RZV was mired in a strong downtrend. This also was hard on Sabrient's GARP portfolios.

RZV = S&P SmallCap 600 Pure Value ETF  
RPG = S&P LargeCap 500 Pure Growth ETF

However, as noted in the top chart and magnified on the bottom chart, since 5/15/20 there has been an accelerating rotation into Small caps, Value factor, and Cyclical sectors – i.e., a promising attempt at convergence of the historic Growth/Value and Large/Small divergences. This has been beneficial to Sabrient's GARP portfolios.

# Performance of Sabrient's live GARP Portfolios (Baker's Dozen, Forward Looking Value, Small Cap Growth, Dividend):

1. Since launch, and 2. Since the 2020 year-end value rotation commenced on 10/30/20

Baker's Dozen & FLV - Gross performance thru: 5/31/2021

Portfolio	Launch Date	Model Portfolio Gross Return Since Launch	SPY Return Since Launch	Model Portfolio Gross Return Since 10/30/20	SPY Return Since 10/30/20
Q2 2020 BD	4/20/20	24.8%	51.6%	12.7%	29.6%
2020 FLV	7/2/20	33.2%	36.1%	32.2%	29.6%
Q3 2020 BD	7/20/20	39.4%	31.0%	38.6%	29.6%
Q4 2020 BD	10/20/20	39.1%	23.2%	44.4%	29.6%
Q1 2021 BD	1/20/21	8.0%	9.8%	N/A	

All portfolios launched since December 2019 were created with the *enhanced* GARP model and selection process that allows for a balance between secular and cyclical growth and across large/mid/small market caps, helping to boost relative performance versus the benchmark while striving for consistent "all-weather" performance.

[As a reminder, the Q2 2020 *Baker's Dozen* portfolio was constructed during the depths of the pandemic when most companies had *little or no forward visibility*.]

Small Cap Growth - Gross performance thru: 5/31/2021

Portfolio	Launch Date	Model Portfolio Gross Return Since Launch	SLYG Return Since Launch	Model Portfolio Gross Return Since 10/30/20	SLYG Return Since 10/30/20
SCG 26	3/11/20	108.9%	75.0%	68.5%	46.5%
SCG 27	6/9/20	54.6%	48.1%	52.0%	46.5%
SCG 28	9/4/20	57.5%	44.9%	53.5%	46.5%
SCG 29	3/15/21	2.1%	-2.6%	N/A	

All Small Cap Growth portfolios are outperforming their benchmark.

Sabrient Dividend - Gross performance thru: 5/31/2021

Portfolio	Launch Date	Model Portfolio Gross Return Since Launch	SPY Return Since Launch	Model Portfolio Gross Return Since 10/30/20	SPY Return Since 10/30/20
Div 28	7/12/19	24.9%	44.2%	60.6%	29.6%
Div 29	10/7/19	36.3%	47.2%	49.7%	29.6%
Div 30	1/3/20	19.9%	33.1%	50.3%	29.6%
Div 31	4/1/20	96.1%	73.4%	52.8%	29.6%
Div 32	6/30/20	41.1%	37.8%	42.0%	29.6%
Div 33	9/28/20	43.1%	26.6%	39.2%	29.6%
Div 34	12/21/20	24.4%	14.6%	N/A	
Div 35	3/19/21	7.9%	7.8%	N/A	

The Sabrient Dividend portfolios have all outperformed the S&P 500 since the value rotation commenced on 10/30/2020, and all Dividend portfolios launched since April 2020 (employing the enhanced GARP model and selection process) are outperforming the S&P 500 over their full life since launch.

Past performance is no guarantee of future results. Refer to Disclaimer page for other important disclosures.

# Process Enhancements

Starting with December 2019 *Baker's Dozen*

1. Add sector constraints relative to benchmark to reduce relative volatility
  - Still maintains the long-standing overall 30% sector maximum allocation
  - Limits extreme sector “tilts” away from S&P 500 allocations (15-30% range)
  
2. Add new proprietary **Growth Quality Rank (GQR)** to the model
  - Measures:
    - a) *Consistency* of past and expected earnings growth
    - b) Historical *reliability* of meeting forward estimates (i.e., “surprises”)
    - c) Probability that consensus earnings estimates will be achieved
  
  - Puts *secular* growth on more equal footing with *cyclical* growth in rankings
    - a) Secular growth stocks tend to have higher valuations but more consistent EPS growth
    - b) Cyclical growth stocks tend to have lower valuations but more volatile EPS growth

# ***Sabrient***<sup>®</sup>

- **Quantitative** fundamentals-based multifactor models since 2000
- Diverse team of engineers/analysts/programmers, led by former NASA engineer (Apollo 11 moon landing) **David Brown**
- Numbers-driven; Bottom-up rather than top-down
- Focused on ***Growth At a Reasonable Price*** (GARP)
- Relies on database of sell-side analyst estimates  
=> Key metric: Forward PEG ratio (next 12 months)
- In 2009, introduced *quantamental* GARP approach to create the *Baker's Dozen* annual portfolio of 13 top picks

- **Fundamental** in-depth forensic accounting analysis since 2002
- Team of CFAs, CPAs – finance & accounting backgrounds, led by President & Director of Research **Brent Miller**, CFA
- Institutional clientele (mostly long/short hedge funds)
- Earnings quality and anomalous insider activity
- Acquired by Sabrient in 2011
  - ➔ Long vetting helps to “play defense”
  - ➔ Built **Earnings Quality Rank (EQR)** for use in GARP model  
[EQR is also licensed to hedge funds and to the *First Trust Long-Short ETF (FTLS)*]

# Gradient Vetting Process

- Identify aggressive accounting practices (“financial engineering”)
- Examine 10-K, 10-Q, earnings releases, conference call transcripts
- Review accruals, working capital, cash flow, GAAP/non-GAAP adjustments
- Identify overstating assets & revenue, understating liabilities & expenses
- Corporate integrity and governance
- Insider behavior (anomalous buying/selling)
- Sell-side reports, regulatory review, any circulating short thesis
- Involves only *publicly available* information

# Sabrient “Quantamental” Approach

**1. Quantitative screen** to narrow large eligible universe

(Forward P/E, Forward EPS growth, dynamics of analyst estimates, EQR, GQR)

**2. Fundamental analysis** to identify top candidates

(Still mainly numbers-driven, but not algorithmic)

**3. Forensic accounting review** of top candidates

**4. Final Stock Selection**, with sector limits

# Various GARP Portfolios

- 1. Baker's Dozen** – Sabrient's 13 top GARP picks (all caps), published quarterly
- 2. Forward Looking Value** – mid-year GARP portfolio of 30-35 stocks (all caps)
- 3. Dividend** – 50 stocks, GARP with solid dividends, 4-5% yield, quarterly
- 4. Small Cap Growth** – 50-stock GARP portfolio, all under \$3.7B cap, quarterly

# Dec 2019–Q2 2020 *Baker's Dozens*

Risk-on optimism gives way to COVID selloff, then a strong but narrow recovery  
 [Comparisons also include Equal-Weight indexes for S&P 500 (RSP), S&P 400 mid caps (EWMC), and S&P 600 small caps (EWSC)]

	<b>Average</b>	<b>39.4%</b>	<b>18.8</b>	<b>16.7</b>	<b>55.1%</b>	<b>124.7%</b>
SPY	SPDR S&P 500 ETF Trust	31.0%				

Portfolio boosted by two stellar performers from technology & consumer sectors but held back by seemingly unwarranted weakness in two healthcare names that easily beat estimates, plus the gold miner. Overall, 12 of the 13 have either exceeded or come close to meeting estimates.

# Market Outlook

1. Continued resurgence in global growth, US corporate earnings, and CapEx
2. Rising inflation, but low interest rates persist as Fed continues to provide support
3. Massive monetary & fiscal stimulus continues unabated, plus likely infrastructure bill
4. Full economic reopening coming sooner than expected (perhaps this summer)
5. Equity valuations are elevated but justified by robust projected growth, massive liquidity, low interest rates, and a lack of good alternatives (“TINA”)
6. Favors value/cyclicals/smaller-caps as market rotates/broadens, plus high-quality secular growers & dividend payers, active selection, and equal-weight indexes

➤ **Main Risks:**

- (1) Double-dip global economic recession from resurgence or vaccine-resistant mutation of COVID-19
- (2) A sustained surge in inflation, a selloff in longer-term bonds, and fast-rising interest rates
- (3) Escalation in financial/technological/military conflicts with China and global hegemony
- (4) US dollar meltdown due to massive stimulus and loss of “safe haven” status (*longer-term issue*)
- (5) Deleveraging a heavily-indebted global economy (*longer-term issue*)

# Q2 2021 Baker's Dozen Portfolio

- a large/mid/small cap mix of 3/6/4
- a value bias with 6 growth versus 7 value stocks
- 5 *secular* growth Tech/HC companies balanced with 8 *cyclical* growth Consumer/Industrial/Materials/Energy/Financial names

EQR has quintile scale of 1-5 (5 is best)  
GQR has decile scale of 1-10 (10 is best)

# Talking Points Summary

- After 6½ years of strong performance from 2009 thru mid-2015 in Sabrient's *Baker's Dozen*, the market became narrow and news-driven leading to **stark divergences in Value vs. Growth factors and Small vs. Large caps** that have been quite harsh on most value and GARP strategies, including ours. Also, narrow leadership meant that a handful of stocks drove **cap-weighted indexes to greatly outperform equal-weight indexes**. Many of the best growth stocks were bid up to such high valuations that they did not score well in our quantitative rankings while most cyclical sectors sold off.
- This led Sabrient to develop and implement **process enhancements** to make its portfolios more "all weather" – primarily by adding a new Growth Quality Rank (GQR) to our quant model that rewards a history of earnings consistency & reliability, in addition to attractive forward valuations and earnings quality that the model has long favored – thus allowing for **exposure to both the long-term secular growth trends and the shorter-term cyclical growth opportunities**. (Also, we continue to have the forensic accounting team from subsidiary Gradient Analytics review every candidate for the portfolios.)
- Indeed, **Sabrient's newer portfolios since December 2019 have shown significantly improved performance** relative to the benchmark, with *some of them substantially outperforming* during quite a range of evolving market conditions. The only portfolio that is significantly trailing its benchmark (although still strongly positive) is the Q2 2020 *Baker's Dozen*; however, it was constructed during the depths of the pandemic in April 2020 when most companies had little or no forward visibility, which Sabrient's model depends upon.
- We expect Value/Growth and Small/Large performance divergences will continue to converge and leadership will broaden such that *active selection, strategic beta, and equal weighting should thrive*. **This should be favorable for growth at a reasonable price (GARP) strategy like Sabrient's.**
- Regardless, our new portfolios – including the Q2 2021 *Baker's Dozen* that launched on 4/20/21, Small Cap Growth that launched on 3/15/21, and Sabrient Dividend portfolio that launched on 3/19/21 – **reflect better balance** between cyclical and secular growth and across market caps.
