This document is neither a solicitation to buy nor an offer to sell securities, and it is not intended as investment advice. Information contained herein reflects our judgment or interpretation at the time of publication and is subject to change without notice. This information, including gross historical performance, pertains solely to the theoretical *model portfolios* published by Sabrient Systems LLC. Sabrient is not responsible for the usage of such portfolios by any third party, including without limitation the Baker's Dozen UITs sponsored by First Trust. In addition, the performance numbers herein do not reflect the deduction of brokerage commissions, execution fees, or other expenses that may be paid by any third party making its own investment in the portfolios. First Trust UITs are subject to fees, NAV on purchase date, and variations in construction of the portfolios, which may over time reduce performance of such UITs in comparison with the performance of Sabrient's model portfolios.

Summary Talking Points

1. The **Baker's Dozen Annual Model Portfolio** launched January 2009 (near bottom of Global Financial Crisis). Over the full 17¾ years through 9/30, it shows an average annual gross total return of **+21.4%** vs. +14.8% for SPY, and outperformance has been accelerating over the last 3 years (Slide 4).
2. Our suite of portfolios includes quarterly **Baker's Dozen, Dividend, and Small Cap Growth**, and annual **Forward Looking Value**. Of our most recent portfolios over the past 3 years, **37 of 44 (84%)** have outperformed or stayed even with their benchmarks (gross total return) (Slide 7).
3. The **new Q4 2026 Baker's Dozen** just launched 10/20 with 13 concentrated positions across market caps and 7 business sectors (Slide 5). It is designed to offer the potential for outsized gains. For example, Q1 2024 Baker's Dozen finished **+46%** vs. +8% for SPY, Q1 2025 was up **+47%** vs. +20% for SPY, the Q3 2025 portfolio just terminated on 10/20 up **+33%** vs. 24% for SPY, and Q4 2025 is up **+31%** vs. +17% for SPY as of 10/20 (gross return).
4. The **annual Forward Looking Value 14** launched on 8/26 with a diverse mix of 31 stocks across 9 business sectors and a 15/16 Large/SMID-cap mix (Slide 6). Last year's FLV 13 terminates on 11/17 and is up **+41%** vs. +20% for S&P 500 Value (SPYV) as of 10/20 (gross return).
5. **Small Cap Growth 52** launched on 9/15 with 44 stocks, providing an alpha-seeking alternative to the Russell 2000 for small-cap exposure given improving market breadth. The last-to-terminate SCG 47 was up **+36%** vs. +19% for S&P SmallCap 600 Growth (SLYG), upon termination on 10/16 (gross return).
6. **Dividend 57** launched on 8/4 with 48 stocks. It offers a **current yield of 3.86%** and employs a Growth & Income strategy with bond-like yield while seeking capital appreciation from high-quality companies. All 8 live Dividend portfolios are beating the S&P 500 High-Dividend (SPYD) benchmark.
7. The **First Trust Long-Short ETF (FTLS)** is an actively managed, low-beta portfolio that licenses as a quality prescreen Sabrient's Earnings Quality Rank (EQR), an accounting-based risk assessment signal used in all our portfolio strategies. The fund now has over **\$2.6 billion** in AUM.
8. Our **Sector Rotation Model** Portfolio continues to reflect a bullish bias and suggests holding Technology, Telecom, and Industrials (Slide 9).
9. Uncertainties persist with Iran, oil prices, supply chains, trade deals, Ukraine, federal debt/deficit, sticky inflation, stagnant jobs, rising yields, Fed policy, midterm elections, and AI backlash. But fundamental **tailwinds outweigh headwinds** in our view given AI optimism and capex, deregulation, lower taxes, re-privatization, re-industrialization, rising corporate productivity/margins/earnings, low credit spreads, and structural disinflationary trends (Slides 10-11).
10. Given healthy market broadening beyond Big Tech, rather than investing in the passive cap-weighted indexes dominated by mega caps, **investors may be better served by active stock selection** that seeks under-the-radar and undervalued gems primed for explosive growth. *This is what Sabrient aims to do in our various portfolios*, all of which provide exposure to Value, Quality, Growth, and Size factors and to both secular and cyclical growth trends.
11. We continue to enhance our **process-driven methodology** and "quantamental" selection approach with AI tools and new models (Slides 12-13). You can access many of our models through **Sabrient Scorecards for Stocks and ETFs** at ***Moon Rocks to Power Stocks*** (slide 14).

Sabrient Portfolios: leveraging our “quantamental” approach

- **Q4 2026 Baker’s Dozen** (quarterly, 13 stocks) launched 10/20
 - ⇒ *Our flagship product is a concentrated, all-cap, alpha-seeking portfolio*
 - ⇒ *Balances value and cyclical growth with high-quality (not speculative) secular growers*

- **Forward Looking Value 14** (annual, 31 stocks) launched 8/26
 - ⇒ *Less-concentrated and more value-oriented version of the Baker’s Dozen*
 - ⇒ *With 50/50 Large/SMID-cap mix, it may benefit from improving market breadth*

- **Dividend 57** (quarterly, 48 stocks) launched 8/4
 - ⇒ *High-quality GARP + Income portfolio; bond-like income with capital appreciation*
 - ⇒ *Current Yield of 3.86% on NAV as of 10/20*

- **Small Cap Growth 52** (quarterly, 44 stocks) launched 9/15
 - ⇒ *Alpha-seeking alternative to the passive Russell 2000 for small cap exposure*
 - ⇒ *May benefit from improving market breadth and mean reversion of Small vs. Large cap*

Sabrient Baker's Dozen Annual Model Portfolio (reconstituted each January)

(17³/₄ years: 1/1/2009 inception thru 9/30/2026, end-of-month data points, updated quarterly)

Q2 2026 BD	4/17/26		-2.2%	8.8%	-11.1%
Q3 2026 BD	7/20/26		-5.6%	3.9%	-9.5%

Tables show gross total returns (as displayed on ftpportfolios.com, without transactional sales charge) versus relevant benchmarks for all live portfolios plus some recently terminated. S&P 500 Value (SPYV) is the benchmark for Forward Looking Value, S&P 500 High Dividend (SPYD) is the benchmark for Dividend portfolios, and S&P 600 Small Cap Growth (SLYG) is the benchmark for Small Cap Growth.

The vast majority (**72%**) of portfolios created since major process enhancements were implemented in December 2019 have either outperformed or stayed even with their benchmarks—and we have continued to enhance our process with Monte Carlo analysis and AI tools. To wit, **37 of the 44 most recent portfolios (84%)** over the past 3 years across all themes have outperformed or stayed even with their benchmarks.

To illustrate the **outperformance potential**, Q1 2024 Baker's Dozen finished **+45.7%** vs. +8.2% for SPY, Q3 2024 Baker's Dozen **+41.7%** vs. +24.1% for SPY, Q1 2025 Baker's Dozen **+46.7%** vs. +20.3% for SPY, and SCG 46 **+75.9%** vs. +48.8% for SLYG. Also, Q1 2026 Baker's Dozen is up **+27.0%** vs. +14.4% for SPY, FLV 13 is up **+40.6%** vs. +20.2% for SPYV, and Dividend 49 just terminated at **+49.2%** vs. +25.9% for SPYD.

Top performers in recent Baker's Dozen portfolios

Sabrient's models often uncover high-quality, undervalued, under-the-radar names. In fact, many of the top performers in our recent Baker's Dozen portfolios might not have been on your bingo card at the time (terminated portfolios shown in dark blue, live portfolios shown in green (as of 10/20):

Q1 2024: AppLovin (APP) +455%

Q2 2024: NVIDIA (NVDA) +125%

Q3 2024: Carpenter Technology (CRS) +103%

Q4 2024: Seagate Technology (STX) +191%

Q1 2025: Comfort Systems (FIX) +224%

Q2 2025: Sterling Infrastructure (STRL) +363%

Q3 2025: Valero Energy (VLO) +197%

Q4 2025: RingCentral (RNG) +206%

Q1 2026: Valero Energy (VLO) +135%

Q2 2026: AbbVie (ABBV) +39%

Q3 2026: Hewlett Packard Enterprise (HPE) +26%

SectorCast Rankings and Sector Rotation Model

Sabrient SectorCast Sector Rotation Strategy - As of 10/20/2026 Suggested Top 3 Sector ETFs for Bullish, Neutral, or Defensive Outlooks Bullish/Neutral/Defensive bias based on SPY vs. 50/200 day moving averages; 30-90-day forward look							
Sector	ETF	Outlook Score	Bull Score	Bear Score	Net Score: Neutral Bias	Net Score: Bullish Bias	Net Score: Defensive Bias
TECHNOLOGY	IYW	85	67	44	85	90.0	42.9
ENERGY	IYE	82	44	78	82	41.4	90.0
TELECOMMUNICATIONS	IYZ	56	60	52	56	65.7	44.3
INDUSTRIALS	IYJ	50	56	54	50	55.4	45.1
FINANCIALS	IYF	49	55	57	49	53.0	49.0
BASIC MATERIALS	IYM	49	55	55	49	53.0	46.1
UTILITIES	IDU	23	53	63	23	40.0	48.5
HEALTHCARE	IYH	19	52	62	19	36.6	45.7
CONSUMER STAPLES	IYK	18	46	72	18	23.8	59.5
CONSUMER DISCRETIONARY	IYC	16	53	55	16	37.6	34.8

Sabrient's **Outlook Score** employs a forward-looking fundamentals-based scoring algorithm to create a composite profile of the constituent stocks. **Bull Score** and **Bear Score** are based on price behavior of the underlying stocks on particularly strong and weak days over the prior 40 market days. High Bull indicates a tendency for relative strength in a strong market, and high Bear indicates a tendency for relative strength in a weak market (i.e., safe havens). High for all scores is 100, and higher is better.

Our SectorCast rankings reflect a **bullish bias** as cyclicals and secular growth sectors dominate the top of the list while defensive sectors Utilities and Staples sit at the bottom. The main caution is the extremely low score for Consumer Discretionary. However, earnings growth, margins, and productivity continue to be stellar, with rising forward guidance. So, investors continue to look beyond the ongoing Iran conflict and its impacts on energy, shipping, supply chains, inflation, and interest rates, as corporate capex, GDP, and core inflation metrics have been encouraging, despite sticky headline inflation. Investors remain optimistic about AI, fiscal policy, deregulation, re-privatization, and re-industrialization. The main obstacles now are elevated bond yields and growing calls to slow the rapid pace of AI development, the infrastructure buildout, and growing debt-driven capex.

Technology remains firmly at the top despite a still-high valuation as investors are willing to pay up for strong growth and margins, increasingly reflecting AI becoming deeply embedded in business operations in a long-term secular investment cycle rather than just a short-term cyclical trend. The sector still displays the highest forward P/E of 25.3x, which is down quite a bit versus when it was approaching 31x several months ago. It remains atop the rankings due to a strong and rising EPS growth estimate, now at 28.9%, and the highest profit margins, return ratios, and insider buying. It also sports a modest forward PEG ratio of 0.88, which continues to remain below 1.0 as prices consolidate while EPS estimates rise.

Our **Sector Rotation Model Portfolio** still reflects a **bullish** bias (when price is above the 50-day and 200-day moving averages), although it is barely clinging above its 50-day MA. For now, it suggests holding **Technology (IYW)**, **Telecom (IYZ)**, and **Industrials (IYJ)**. A switch to neutral would simply put in Energy (IYE) in place of Industrials.

Market Observations & Outlook - 1/2

1. S&P 500 remains near its all-time highs despite new AI fears, high energy prices, sticky inflation, high bond yields, and rising credit spreads. It still enjoys robust corporate margins and earnings, subdued VIX, fiscal support, and optimism about a Middle East resolution. Uncertainty persists with midterm elections, wars, tariffs, federal debt, and Fed policy. But the **K-shaped economy**, stagnant jobs, stable core inflation, poor consumer sentiment, high household debt, and slow global liquidity growth **suggest need for rate cuts**.
2. Notably, **leadership had been expanding** this year, with the Dow, small caps, and equal-weight S&P 500 hitting new highs in August before falling, while S&P 500 and Nasdaq 100 hit highs into October before succumbing. This is allowed valuations to compress. Forward P/E on cap-weight S&P 500 around 19x while equal-weight S&P 500 is 16x and Russell 2000 is around 16x, as of 10/20.
3. Headline inflation persists due to continuing energy/supply shocks in Middle East. But **core inflation is stable and disinflationary secular trends** remain poised to take over once the conflict ends, including accelerating disruptive innovation (AI and automation), rising productivity, falling shelter/energy costs, slow global liquidity growth, stable/strong dollar, aging demographics, and deflationary impulse from struggling China ("dumping" goods), and new/redundant industrial capacity from re-industrialization/reshoring.
4. Overall, **fundamental tailwinds outweigh headwinds**, and investors are positioning for continued AI adoption and capex, re-industrialization, smaller government, less Fed intervention, and pro-growth fiscal support. This should continue to attract foreign direct investment (FDI) into the US, cut the debt and deficit-to-GDP ratio, and unleash organic private sector growth, with stock valuations driven more by rising earnings and ROI than by AI hope-driven multiple expansion.

Market Observations & Outlook - 2/2

5. The **US economy has become more recession-resistant**, more technology-efficient, more services-oriented (meaning less energy-intensive and less at risk of inventory buildup that must be dumped cheaply into the market, like China does), and thus less cyclical. So, a steadier, more predictable economy means structurally higher corporate margins, earnings, cash flow, and capex consistency, which supports higher valuation multiples, lower credit spreads, a subdued VIX, and a buy-the-dip investor mentality. It seems that only surging bond yields and an AI-related credit crisis (from overleverage) could derail it.
6. At the core of an equity portfolio still should be US Big Tech stocks, given their entrepreneurial culture, disruptive innovation (including AI), wide moats, global scalability, huge cash generation, durable earnings growth, and world-leading margins and ROI. But slowing EPS growth among the MAG7 and rising EPS growth among the "S&P 493" **suggests greater market breadth and additional opportunities** in AI infrastructure (including power/energy) as well as small/mid caps, value, quality, cyclicals, equal-weight indexes, and sectors like industrials, financials, materials, and healthcare, plus dividend stocks and bitcoin. Also, investors might consider hard asset plays like oil, agriculture, commodities, industrial metals, uranium, rare earths, land, miners, engineering & construction firms, and equipment & services providers.
7. Thus, rather than the passive cap-weighted indexes, investors may be better served by active stock selection that seeks to identify under-the-radar, undervalued, high-quality gems primed for explosive growth. **This is what Sabrient seeks to do in our various portfolios**, all of which provide exposure to Value, Quality, Growth, and Size factors and to both secular and cyclical growth trends.

=> *All this is discussed in detail in our "Sector Detector" market commentaries at [Sabrient.com](https://www.sabrient.com).*

Company Overview

➤ Sabrient Systems LLC:

- Independent equity research provider and registered investment advisor (RIA) founded in 2000
- Quantitative fundamentals-based multifactor models created by:
 - ✓ team of engineers and analysts led by founder David Brown, a former **NASA** engineer on the Apollo 11 moon landing project, and CEO Scott Martindale, a former **Chevron** engineer
 - ✓ team of forensic accounting specialists from Gradient Analytics, a wholly owned Sabrient subsidiary
- Process-driven, bottom-up methodology leveraging a scientific hypothesis-testing approach to model development
- Leverages **proprietary AI tools** to accelerate model development and enhance fundamental research in portfolio selection
- Unlike most RIAs, we don't manage investor money directly but instead receive licensing/consulting fees

➤ Products & Services:

- Quantitative equity research, models and data sets, rankings of stocks & ETFs, online investor tools, and insightful market commentaries
- Portfolio strategies for various investing styles, stock portfolios for UITs and SMAs, rules-based equity indexes for ETFs
- Best known for our **Baker's Dozen** franchise, a 13-stock portfolio first introduced in 2009 based on a proprietary Growth at a Reasonable Price (GARP) "quantamental" approach
- Baker's Dozen and 3 other offshoot strategies offered as **UITs through First Trust Portfolios**
- 8 core proprietary multi-factor models, including the **Earnings Quality Rank (EQR)**, an accounting-based risk signal designed by subsidiary Gradient Analytics and used internally for Sabrient portfolios. It is also licensed to hedge funds and to the **First Trust Long-Short ETF (FTLS)**.

What We Do: Our Active “Quantamental” Approach

1. **Quantitative screen** to narrow large eligible universe (50-100 names)

Forward P/E, forward EPS growth, recent revisions to analyst consensus estimates, earnings quality (based on expertise of subsidiary Gradient Analytics), consistency & reliability of earnings growth.

2. **Fundamental analysis** to identify top candidates (approx. 25 names)

Still mostly numbers-driven but not algorithmic. AI-assisted to thoroughly vet recent news reports, fundamentals, long & short theses, and fundamental risk assessment.

3. **Final Review & Portfolio Selection** (13 names)

Manual process, ensuring diversification and adhering to sector concentration limits.

We believe a GARP strategy is “all-weather.” So, what could go wrong? Two things:

- 1) Consensus EPS estimates are reduced after portfolio launch or the company fails to achieve them.
- 2) Investor sentiment turns defensive, leading to narrow market breadth and avoidance of lesser-known firms.

Sabrient Scorecards – powerful investor tool

You can access the next-gen **Sabrient Scorecard for Stocks**, which provides a **weekly Top 30 list** for each of Sabrient's four key investing strategies—Growth, Value, Dividend, Small Cap—using our underlying quant models. It also lets you score, sort, weight, and **monitor your own stocks** across roughly 4,000 equities.

And as a bonus, we provide a weekly **Sabrient Scorecard for ETFs** with a **weekly Top 30 ETFs** based on our SectorCast Outlook Score, plus access to the Full Universe of scores for over 1,800 equity ETFs.

Sabrient founder David Brown wrote a book, ***Moon Rocks to Power Stocks***, which describes his path from NASA engineer in the Apollo Program to building quant models for stock rankings. It reveals the details behind the model-driven strategies for those four key investing styles.

And as bonuses for subscribing to the Scorecards, you can immediately download (in PDF format) David's book plus two bonus reports:

1) ***The Future of Energy*** and 2) ***A New Race to the Final Frontier (Space)***, which describe the history and what the future may bring for each theme, as well as Sabrient's latest top stock picks for each.
